

Custom Products and Table Caddies

Custom Products

To meet our customers' specialized needs in the ever-changing commercial food industry, **Pronto Products** continues to manufacture custom products in addition to our standard lines. For custom product design and manufacture, we require the following:

- The product must be fabricated from wire, including either plain steel, stainless steel wire, or mesh in any size.
- The product must be in the food service industry.
- The minimum quantity per order is 200.

Our Arcadia, CA facility is well equipped to handle large-quantity production runs. We furnish prototype models and conduct test-market production runs upon request. As an added service to our customers, we can also warehouse after-market products to be shipped as needed. We invite you to visit our plant to see for yourself **Pronto Products'** quality control and manufacturing capabilities.

Custom Table Caddies

In response to our customers' request for unique caddies, **Pronto Products** manufactures a custom caddy line in addition to our standard product line. Custom caddy orders are manufactured in our Arcadia plant and require a minimum of 200 per order. In designing specialty caddies, we make every effort to accommodate your special handle or logo requirements. The process begins with a review of your sketch, along with any additional information you wish to include. We also require the specific items that will be placed inside the caddy, such as condiments, straws, table menus or advertising cards.

At your request, **Pronto Products** will then furnish a line drawing of the final product and/or a sample prototype. Once the approval is received, we issue a price quotation to the dealer of your choice. **Pronto Products** looks forward to providing you with quality caddy products to meet the specialized needs of the commercial food industry.
